American Solar Electric Inc. and Cachet Homes are partnering on solar systems for a new Chandler development.

Cachet's Paseo Lindo community will have 3- and 5-kilowatt systems available from Scottsdale-based American Solar Electric, which could save owners between \$569 and \$949 annually.

The solar systems will be identical to those American Solar has installed for other home builders, the panels resembling roof tiles to blend in with the subdivision, officials said.

The homes at Paseo Lindo range from about 1,600 to 2,600 square feet. Prices start at \$216,000.
