

NEW FEATURES FLUTTER INTO FULTON RANCH Fragrant Foliage to Attract Hummingbirds and Butterflies

Phoenix – Desiring to create a nature-oriented atmosphere for its residents, Cachet Homes has included a very special park in one of their highly anticipated neighborhoods at **Fulton Ranch**, one of the last master-planned communities slated for Chandler.

The comforts of a small, lakeside town will be complete with the cheerful ambiance of butterflies and hummingbirds. The park at Cachet Homes' townhome community, Crescent Falls, has been specifically designed to present a picturesque landscape sprawling with plants attractive to multiple species of both hummingbirds and butterflies. The fragrant foliage and flower selections will attract these fluttering friends year-round. Cachet Homes is pleased to be the first builder to blend the simple pleasures of a nature preserve with one of its luxury townhome communities.

The hummingbird and butterfly park is one of many other neighborhood features, including an outdoor amphitheatre. The amphitheatre will feature a covered performance area along with terraced lawns for relaxed viewing. This serene space will make a lovely setting for daytime events such as weddings and other festivities, or residents can dance under the stars on cool evenings.

Traditional amenities and convenient services at Fulton Ranch include shopping, entertainment, dining, and recreation. Balanced with a deep respect for the living landscape, Crescent Falls' residents can be proud to call Cachet Homes at Fulton Ranch "home."

Since its inception in 1990, Cachet Homes has been at the forefront of the Valley's real estate boom and has been recognized among the state's top builders for the last eight years by Arizona Business Magazine's "Ranking Arizona." For more information, visit www.CachetHomes.net.
